

Senior Network Engineer

Company Description

YJT Solutions, LLC (YJT), a top-tier technology and management consulting firm with an unwavering focus on the financial industry, is currently recruiting for a **Senior Network Engineer**.

YJT was founded in 2001 in order to deliver a new level of information technology service previously unheard of in the financial industry. Although we have grown substantially in the size of our clients, the scope of the work we undertake, and the enterprise-level practices that we implement, we remain true to our original goal: Serve our clients.

Combining years of technology and management expertise in the financial industry, YJT helps our clients achieve a competitive edge through optimized technology deployment and/or ongoing support. Our client list includes financial exchanges, clearing firms, international banks, proprietary trading firms, and hedge funds.

YJT employees enjoy working in our fast-paced, detail-oriented, intense environment. We perform at and above the level of top global consulting firms, but we enjoy the camaraderie of a smaller firm and the locally-based nature of our niche practice.

Job Description

The **Senior Network Engineer** will serve as a primary resource for the firm's most complex networking and technical issues. You will learn our firm's methodology for delivering outstanding technology service, and will support our firm by refining that methodology to continually improve our technical project and support work. You will continue to develop their technical skills, along with business knowledge and consulting skills.

Duties and Responsibilities

The duties and responsibilities of the **Senior Network Engineer** will include:

- Solving technical client issues, often under time constraints
- Assisting project leadership in completing project tasks and applying technology to client business issues, such as: specialized security review, network design and implementation, new trading firm build-out, and best practice reviews
- Serving as a key resource for other YJT consultants in solving complex technical issues
- Mentoring junior YJT consultants and guiding the internal YJT technical training program
- Researching new technology and analyzing risks and benefits of applying that technology within our clients' mission-critical environments

- Serving as a lead architect for enterprise-level designs for our institutional networking clients

Qualifications

Successful candidates will have the ability to thrive in an intense industry that relies on the latest advances in technology.

All applicants must have the qualifications listed below.

- Detailed knowledge of and at least 7-10 years experience with configuration, maintenance, and troubleshooting for most of the following:
 - Advanced Routing and Switching (Cisco CCIE preferred)
 - Firewall & Security Technologies
 - Microsoft Windows
 - Linux / Unix
- Bachelor's or Master's degree
- High comfort level working in an intense environment
- Excellent interpersonal and client facing skills
- Ability to adapt work habits to a specified methodology
- High attention to detail
- Consulting experience is a big plus
- Financial industry experience is a plus

Compensation & Benefits

YJT offers a competitive salary based on experience, as well as a unique profit-participation plan paid on a quarterly basis.

All full-time employees are covered by a comprehensive benefits package including:

- An outstanding health insurance plan
- Dental insurance
- Long-term disability insurance
- Short-term disability insurance
- 401K
- Discounted public transportation

To Apply

YJT is committed to being a world-class technology partner to the financial industry. If you are interested in joining our team, please contact us at recruiting@YJTSolutions.com. In order to be considered, applicants must include the following Microsoft Word or PDF attachments:

- Resume
- Cover letter
- Salary history and requirements
