

Application Developer

Company Description

YJT Solutions, LLC (YJT), a top-tier technology and management consulting firm with an unwavering focus on the financial industry, is currently recruiting for an Application Developer.

YJT was founded in 2001 in order to deliver a new level of information technology service previously unheard of in the financial industry. Although we have grown substantially in the size of our clients, the scope of the work we undertake, and our now enterprise-level practices that we implement, we remain true to our original goal: Serve our clients.

Combining years of technology and management expertise in the financial industry, YJT helps our clients achieve a competitive edge through optimized technology deployment and/or ongoing support. Our client list includes financial exchanges, clearing firms, international banks, proprietary trading firms, and hedge funds.

YJT employees enjoy working in our fast-paced, detail-oriented, intense environment. We perform at and above the level of top global consulting firms, but we enjoy the camaraderie of a smaller firm and the locally-based nature of our niche practice.

Job Description

As an Application Development consultant, you will work out of our office or at the client site. You will participate in full life cycle development of a variety of applications, including requirements gathering and analysis, design, development, enhancement, and troubleshooting. You will help our clients improve their basic business performance. You will also be a key resource translating and automating our internal processes.

Duties and Responsibilities:

- Work closely with project managers and other developers to analyze and refine requirements, design solutions, and produce technical specifications.
- Develop applications by completing programming using a variety of languages and software products.
- Integrate applications by designing database architecture and establishing connectivity with network systems and information servers.
- Complete application development by designing and conducting tests, contributing to team meetings; troubleshooting development and production problems.
- Support users by developing and maintaining documentation.
- Contribute to collective team knowledge by researching new technologies and products as well as keeping up to date with professional publications and maintaining person and professional networks.

- Enhance organization reputation by accepting ownership for accomplishing new and different requests; exploring opportunities to add value to job accomplishments.

Qualifications

All applicants must have the following qualifications:

- Graduate (BS, BA, MS or PhD) with a strong academic record preferably with a computer science, engineering or science degree
- 3+ years experience with software development (C++, Java, C#/VB, .NET)
- Excellent written, verbal and interpersonal communications skills
- Superior data modeling and object design skills.
- Experience with XML, HTML
- Understanding and proven experience with Object Oriented Analysis and Design (OOAD)
- Experience in MS SQL Server
- Highly professional demeanor and ability to comfortably interact with team members and clients at all levels

Ideal applicants will have the following qualifications:

- Java / Javascript, Perl
- Experience in software project management
- Prior experience in client services and / or consulting environment
- Prior knowledge in Financial industry

Compensation & Benefits

YJT offers a competitive salary based on experience, as well as a unique profit-participation plan paid on a quarterly basis.

All full-time employees are covered by a comprehensive benefits package including:

- An outstanding health insurance plan
- Dental insurance
- Long-term disability insurance
- Short-term disability insurance
- 401K
- Discounted public transportation

To Apply

YJT is committed to being a world-class technology partner to the financial industry. If you are interested in joining our team, please contact us at recruiting@YJTSolutions.com. In order to be considered, applicants must include the following Microsoft Word or PDF attachments:

- Resume
- Cover letter
- Salary history and requirements
