

Entry Level Network Engineer / Technology Solutions Analyst

Company Description

YJT Solutions, LLC (YJT), a top-tier technology and management consulting firm with an unwavering focus on the financial industry, is currently recruiting for an **Entry Level Network Engineer / Technology Solutions Analyst**.

YJT was founded in 2001 in order to deliver a new level of information technology service previously unheard of in the financial industry. Although we have grown substantially in the size of our clients, the scope of the work we undertake, and the enterprise-level practices that we implement, we remain true to our original goal: Serve our clients.

Combining years of technology and management expertise in the financial industry, YJT helps our clients achieve a competitive edge through optimized technology deployment and/or ongoing support. Our client list includes financial exchanges, clearing firms, international banks, proprietary trading firms, and hedge funds.

YJT employees enjoy working in our fast-paced, detail-oriented, intense environment. We perform at and above the level of top global consulting firms, but we enjoy the camaraderie of a smaller firm and the locally-based nature of our niche practice.

Job Description

The **Entry Level Network Engineer / Technology Solutions Analyst** will first learn our firm's methodology for delivering outstanding technology service and will then apply this knowledge by responding to client networking issues and requests. Analysts will develop technical, business, time management and consulting skills through our internal training program and the use of our network lab.

Duties and Responsibilities

The duties and responsibilities of the **Entry Level Network Engineer / Technology Solutions Analyst** will include:

- Working at client sites and participating in the application of leading-edge technology in critical, time-sensitive environments as knowledge and experience are expanded
- Supporting network engineers to solve client problems, often under time pressure
- Assisting project leadership in completing project tasks and applying technology to client business issues such as specialized security review, network design and implementation, new trading firm build-out, and best practice reviews

Qualifications

All applicants must have the qualifications listed below.

- Knowledge of and some practical experience with configuration, maintenance, and troubleshooting of:
 - Routing and switching (NAT, Multicast, WAN, ISDN, Access lists, etc.)
 - Firewall technologies, including the Cisco PIX
 - NT/Windows-based networking
 - Internet connectivity
- Bachelor's degree with a minimum 3.3 GPA
- Comfortable working in an intense environment
- High attention to detail
- Excellent interpersonal and client facing skills
- Ability to adapt work habits to a specified methodology
- Financial industry experience or a strong desire to learn about the industry

Ideal applicants will have the following qualifications:

- Trading industry experience
- Familiarity with electronic trading vendors, APIs, feeds, etc.
- Detailed knowledge of network security and remote connectivity

Compensation & Benefits

YJT offers a competitive salary based on experience, as well as a unique profit-participation plan paid on a quarterly basis.

All full-time employees are covered by a comprehensive benefits package including:

- An outstanding health insurance plan
- Dental insurance
- Long-term disability insurance
- Short-term disability insurance
- 401K
- Discounted public transportation

To Apply

YJT is committed to being a world-class technology partner to the financial industry. If you are interested in joining our team, please contact us at recruiting@YJTSolutions.com. In order to be considered, applicants must include the following Microsoft Word or PDF attachments:

- Resume
- Cover letter
- Salary history and requirements
